Dear valued customers, shippers, and food safety certifying bodies:

Erb Enterprises Inc. has been a HACCP certified carrier partner in the trucking industry for the last 15 years. In 2000, Erb participated as a partner with KASAR Canada when developing the HACCP trucking food safety program. In 2015, Erb partnered with Iron Apple (formally KASAR Canada) and implemented their HACCP based Preventative Controls Plan (PCP) program. This program is recognized by the Canadian Trucking Alliance (CTA) as an approved Trucking Food Safety Program (TFSP). In June of 2016, the Erb PCP program was audited by an internationally recognized auditing firm AI Global. Erb was the first trucking company in Canada to be audited and certified under the HACCP based PCP program. The Canadian trucking alliance approved TFSP as it had met all CFIA requirements of "Safe Foods for Canadian's Act" (SFCA) and the FDA "Food Safety Modernization Act" (FSMA).

Erb strives to be a leader in all aspects of the trucking industry. We are very proud to say our company and employees are committed to these programs and maintaining food safety throughout the supply chain. Erb has customers and shippers all over North America, many of which are maintaining or working towards meeting the requirements of SFCA & FSMA. This letter is to advise all business partners that Erb meets all food safety requirements as outlined by the above programs. Our food safety preventative control certificates will be available on our website for review and download if required by your company or certifying food safety body. We respect all food safety certifying bodies who strive to direct industry partners, and assist in making sure their business partners meet all aspects of the SFCA & FSMA.

We are certain that our business partners will understand that with the size of the industry and all parties that request food safety information; filling out and returning letters of guarantee for potentially thousands of partners is not a practical option. If your company or food safety certifying body requires a letter of guarantee to be reviewed, signed and returned confirming Erb meets all food safety requirements, an administrative charge for processing the documents may apply. Please review our assurance letter from Iron Apple and contact them directly if you have any questions about our program.
